EMERY EXCITED OVER SUPPOSED OIL FIELDS

Putting in Road to Recent Oil Locations in Southwestern Part of

(Special to The News.) Emery, May 25,-The oil excitement

here continues. The people here are greatly worked up over what promises to make this end of the county one of starting of work on the oil fields to the southeast of Emery is in charge of J. H. Dennis. Thus far Mr. Dennis has had but little to say, but has been going quietly ahead putting things into a tion and preparing for the work.

Nothing is being left unturned on the start. All the teams that can be musthat the heavy machinery, which, we understand, is expected soon, may be taken to the field. The road to the oil field at this time of the year is quite dry and it is further necessary to pack the water to the field as the country about Willow Springs wash is dry as tinder. On account of the floods it will be necessary to do considerable work nlong Muddy creek and also on the hills to the west of the Bad Lands.

It is expected that by the first of June hauling of machinery from Price will commence. At present it is necessary to haul machinery over 100 miles from the railroad to reach the oil field, although Green River is probably not more than 50 miles from the place.

Coal which will be used for the production of rower can be secured within

duction of power can be secured within 15 miles of the oil field and along the road from Emery. It is along the road over which the supplies will have to be hauled and is about four miles southeast of Emery.

The surveying a roadway over some of

field surveying a roadway over some of the untraveled places and platting out the claims, as the southern part of Emery county has never been surveyed.

MARKET IS SICKLY SIGHT.

Inertia Germ Gets Good Footing in Salt Lake Exchange.

inertia germ showed develop-and growth on the Salt Lake The inertia germ showed develop-ment and growth on the Salt Lake Stock & Mining exchange this morning. Judging from the amount of business transacted during the morning session, the brokers must have had peanuts for breakfast. There was not enough busi-ness done during the morning session today to pay the expenses of more than one brokerage house in the city. Trading was at a standstill and the professional washing failed to boost the amount of trading up to a fitting fig-ure.

Just 10 stocks were traded in this

Iron Blosson sold at 50 cents, and rado at 54 cents.

The sales on the curb market this morning were 2,000 shares of Bingham Copper at 15 cents; 200 shares of Opex at 43 cents; 100 at 43; 800 at 42½ cents.

AFTERNOON SALES.

DECREASE OF SUPPLY.

Thompson, Towle & Co. say: One of he leading copper interests in the inited States informs us that, in his opinion, the next statement of the copper Producers' association will show rease of stocks in this country a decrease of stocks in this country. He estimates copper consumption in this country and abroad just at the present time as being about equivalent to the present production, and he sees no reason to anticipate any material improvement in the price of the metal unless the Amalgamated interests should be successful in effecting a large sale of copper. This large sale has been held in abeyance for the past 16 days.

COPPER FORCES READY FOR GREAT STRUGGLE

tion to be Waged by Cole-Ryan And Guggenheims,

That a contest of gigantic proportions is impending between the Amalgamated and Cole-Ryan interests on the one side and the Guggenheims and the various interests associated with them

one side and the cagesians and another various interests associated with them on the other, is the belief of those who have been watching the drift of affairs in the mining world closely in recent months. It will be a fight for supremacy, between the two old time rivals in the smelting and mining fields.

The two big interests have been marshaling their forces and maneuvering for strategic positions for many months and that the contest has not been begun before this time is due, it is understood, to the fact that the big financial interests that frequently are called upon to supply funds for the extensive mining projects of the two crowde involved are counseling them to refrain from open hostilities at this particular time when the markets are in a nervous and unsettled condition.

Relative to the situation the New York Commercial has the following to say:

When the International Smelting &

When the International Smelting & Refining company was formed in the last days of December, 1908, it was predicted that it would become a formidable rival of the American Smelting & Refining company. There were, however, many who believed that the new company would simply round up some of the independent properties and finally be absorbed by the American, giving that concern a grip stronger than ever on the mining and smelting industry. The International has demonstrated that it was not created to be ultimately a part of the American company and there are unmistakable evidences that the new company and the interests allied with it will make a desperate fight for a large share of the smelting and mining business.

FACTIONS LINING UP. When the International Smelting &

FACTIONS LINING UP.

In Ely, Bingham, the "porphyry" camps of Arizona and elsowhere these two forces are lining up to contest for supremacy in the copper branch of the mining industry Not only this—the Cole-Eyan interests are also quietly seeking control of lead-silver properties with a view to becoming a formidable rival of the Guggenheims in this field, and the Guggenheims, cognizant of their rival's aggressive moves in this direction, are taking steps to strengthen their position in the lead-silver fields. en their position in the lead-silver fields. Horace J. Stevens, editor of the Cop-

Horace J. Stevens, editor of the Copper Handbook, came down from Houghton, Mich., a short time ago and he was not long in finding out the inside story of the situation, if he was not fully aware of it before leaving Michigan. He had this to say about the copper situation:

"From what I observed in New York there is evidently a row on, and a good one, between the Amalgamated interests on the one side and the Guggenheims and their low-grade prophyry interests on the other. The rumor is that each interest is short of the other's goods.

er's goods.
"It is plain to be seen that the com "It is plain to be seen that the com-mission houses are not carrying more than 10 per cent of their normal supply of Amalgamated and the same situation holds true in Boston, and perhaps to an even greater extent. The man who sells Amalgamated short is playing with

There is unquestionably a great fu-ture ahead of many of the new porphy-ry copper properties, but I rather in-cline to the belief that their claims as to costs will have to be revised some-what when these mines are fairly un-der way. The first year's costs will offer no criterion of what the later cost will be when the time comes to charge into the operating account machinery renewals, replacements, and the thou-sand and one items which in the aggregate make quite an impress on the

cost sheet.
"If any of the low-grade mines think, however, that they are going to put the Butte camp out of business they are hugging a delusion. The Amalgamated witers are liberal with their depreciamines are liberal with their depreciation charges, and can show a 9-cent cost. As a matter of fact, they could for a few years show a 5-cent cost if they wished to resort to the treatment of only the high-grade ores. This, of course, would be the height of folly, but it simply shows what could be done were such an extreme policy for any reason desirable.

"It looks as though we were to have a surplus of copper output for a time, and the outlook is not rosy. The man who paddles close to the shore will be the wise one. I refer, of course, to the man who speculates in copper stocks."

BETTER COPPER CONSUMPTION.

Paris advices to a prominent banking house of Boston says: France has as much ready money as is possible, or as it has ever had. Business is excellent, and the floods are forgotten. Our cosmopolitan stock exchange people may have bought more or less rubber and oil shares, but that class of speculation has not at all affected the French public. All foreign issues giving more than 5½ per cent interest are swallowed up with extreme rapidity and prove a big success. The future of our country is extremely encouraging.

ing.

As far as Germany is concerned, we are told that conditions are improving, also in Belgium and England. It seems, in fact, as if the European consumption of copper were liable to increase considerably.

OPERATING ALL SECTIONS.

A wire from Ely says: "Ore production for the Nevada Consolidated dur tion for the Nevada Consolidated durlog the past week has been very steady,
averaging around 8,000 tons daily. The
new track to lower levels of Copper
Pit is about completed and will soen
be in operation, after which there will
be no further scarcity of ore, as has
been the case occasionally during the
past month. One of the furnaces at
the McGill plant is being relined, but
all sections of the concentrator are in
operation. From results up to the present time the outturn of copper for the
current month wil lexceed that of last
month."

A dividend of \$1 has ben declared by Copper

W. E. Bubbard returned this morning

E. C. Coffin, superintendent of the lower Mammoth mine is in the city today.

W. B. Farmer and a number of Boston capitalists are expected in Salt Lake today. They are stockholders and officers of Utah Metal Mining company of which Mr. Farmer is president.

The Utah mine at Fish Springs has sent two cars of ore to market during May and before the end of the month it is expected that the third car will be sent in. The carloads net the company in the neighborhood of \$2,300.

The following were the directors re-elected for a four-year term at the annual meeting of the United States Smelting, Refining and Mining com-pany held at Portland, Me.; Robert S. Bradley, Albert F. Holde, Frederick Lyon, James J, Storrow and Sidney W. Winslow.

Within a few weeks the directors

In a statement made in New York recently, Fred A. Flindt, a well known Salt Lake mining man, declared that the tonnage in the Mason Valley Mines company property is nearer 900,000 tons of 4½ per cent copper ore, than 400,000 tons of 4 per cent copper, as has been the statement made by brokers in that part of the country.

The Prince Consolidated company has purchased a quarter interest in the Davidson claim, which adjoins the company's property. The company already owned a half interest before it purchased the quarter interest from August Brodine and Dr. I. R. Bancroft for \$2,500. The remaining quarter interest is held by a Los Angeles man.

table and classiflers, it is declared that table and classifiers, it is declared that the capacity of the Ray Consolidated, 5,000-ton concentrator can be increased to 8,000 tons of ore a day. In this way it is believed that the company, with the annexation of the Gila property, will be producing 100,000,000 pounds of copper a year at a cost of 8.5 cents per pound.

For the first quarter of the current year the net profits of the Florence-Goldfield company were \$11,779.77. The company has filed with the bullion tax collector of the state of Nevada the statement required by law, setting forth that the total ore mined during the quarter was 10,516 tons, the gross yield being \$137,162.92. The cost of extraction amounted to \$71,016.66; smelting and sampling, \$14,524.91; reduction, \$39,844.58. The company paid a tax of \$347.41 on the output.

CONCENTRATES.

from Butte.

On account of Monday being Decora-tion day there will be no sessions of the San Francisco exchanges Saturday and Monday.

It is reported that the Ely Calumet in the Ely district will shortly allow a number of leasers to operate on the company's property.

The Utah Sampling company has just received a carload of zinc ore sent out of the Good Springs district on Dec. 31, 1909, by the Yellow Pine mine. The car has been tied up all this time by the washout on the Salt Lake Route over which it was shipped.

The camp of Wedekind in which the late Gov. John Sparks of Nevada sunk considerable money is shortly to be revived it is declared. The camp is near Sparks, Nev. A number of Chicago capitalists it is said have taken over the Gold King group of claims.

A new wagon road has just been completed to the portals of the tunnel of the Seven Troughs Monarch Gold Mining company, which will allow the company to now haul to its surface workings, which heretofore has had to be done by pack animals.

the Osceola Mining company of Michigan will hold a meeting for the purpose of passing on the semi-annual dividend. Six months ago the dividend was \$4. The future payment will probably be reduced to \$4 or \$5 a share.

By means of the Garfield roughing

MARKET ACTIVE AT COST OF VALUES

New York, May 25.—A moderate degree of activity accompanied a comprehensive rise in the opening prices of stocks today in which the Canadian group was quite prominent. Canadian Pacific rose 2, Consolidated Gas 2, Soo Line, Ontario & Western, New York Central and Baltimore & Ohio large fractions. Bethlehem Steet Jost I.

Opening prices were the best, as liberal selling orders were distributed, driving down the leading stocks a good fraction below yesterday's closing. Canadian Pacific lost half of its advance and Chicago Great Western preferred lost 1½ and keading and American Steet Foundries I. International Harvester and American Hide & Leather preferred rose 1. New York, May 25 .- A moderate de-

rose 1
The dull and sluggish action reflected the absence of general interest in the market. The neglect was ascribed to the desire to await clearer light on general conditions. General Chemical rose 4, Reading fell 1½, Enion Pacific 1½, Brooklyn Union Gas 1% and Southern Pacific, Amalgamated Copper, American Smelting & Refining and American Locomotive 1.

Smelting & Reining and American Locomotive 1.

Bonds were steady.
After a long interval of neglect the market started downward again with Reading and Union Pacine leading the decline. Great Northern preferred and Western Maryland fell 1.
Activity increased at the expense of values, with selling converging on Reading. Union Facilic and U. S. Steel, Losses of a point or more were numerous. Reading gave way 24. Union Pacific 25, St. Paul, Southern Pacific, American Smelting and American Locomotive, 2, Great Northern preferred, Atlantic Comst. Line, Atchison United States Steel and Amaigamated Copper 1½ and 1%. The railroad debate in the United States senate affected the market.

the United States senate affected the market closed very weak at the lowest prices. Stocks continued to come out with disquieting effect on sentiment, causing fears of some unknown development impending. Losses in Reading reached 3½, Central Leather 3½, Union Pacific 3½, Southern Pacific and American Smelting 2½, Amalgamated Copper 2½, Chicago Great Western preferred 2½, Wabsash preferred, New York Central and Great Northern prefered 2½, United States Steel 2½, Rock Island 2, and a number of the most active speculative stocks 1½ to 1½.

Pulled—Extra, 63; fine A, 60@62; A supers, 58@60. particularly beautiful bird, with breast of richest yellow and a coal-black spot at his threat. He is also a delightful congster, and his carol to the dawn has cheered millions of American ploughboys as it echoed in their willing ears on their way to the field. In the crop season the lark is the ally of the farmer, destroying immense numbers of grubs that prey on the roots of grasses, sapping their vitality. He is then rearing a numerous and a respectable family, and is as happy as the day is long. In whiter he is gregarious. It is a delight to listen to the rich and tuneful notes of these birds as they hold conventicle in some naked and sparred tree of the bleak meadow, or bare field.—Washington Post.

PRODUCE.

Chicago, May 25.—Heavy selling all along the line today greeted speculiators who thought that, after daily big breaks in wheat prices, the market, whatever the ultimate outcome, would at least temporarily make a rally. Adverse to this opinion was the fact that foreign news was more bearish than ever, Russia was reported as making preparation to supply 2,000 addition freight cars to help move the new erop. finds sent assertions of an output of 320,000,000 bushels as against 214,000,000 bushels a yearago. American weather conditions were tine in all directions and the crop outlook was declared to be still improving. First prices were irregular, ¼ higher to % lower. The May delivery, however, was the only one on the list showing a gain, selling up to 108. September opened to ½ 10 % down at 95% to 37 and fell to 56½. May quickly followed suit.

Corn started easier but rebounded on getting good support from a leading local firm and from commission houses. September opened ½ lower at 59% and advanced to 60%.

Trading in oats was light. Fluctuations followed the lines taken by corn. September began ½ 3% of at 37½ and then went to 37%.

Buyers of provisions were scared away by a slump in hog prices. The opening was 7½ to 40 cents under the previous close, with September products at 22,009 2.20 for pork, 12.66 to 12.17½ for lard, and 12.12½ for ribs. Further declines ensued.

Wheat—Because big shorts who cover-

ing a new method of treating wood which has been invented and tried with much success in Australia: "The essential part of the Powell wood process consists in bolling the wood and allowing it to cool and absorb a saccharine solution, after which it is dried, rendering the wood thoroughly seasoned within a few days after cutting, increasing its strength and stopping all warping and shrinking. The sap in the wood is driven out and replaced by an antiseptic, owing to the saccharine solution boiling at a higher temperature than water, thus making the wood impervious to dry rot and to the attacks of white ants and other parasites which prey on e-dinary lumber.—Consular Report.

22.20 for pork, 12.60 to 12.172 for mark, and 12.1225 for ribs. Further declines ensued.

Wheat—Because big shorts who covered yesterday were again thought to be buying, the market made a quick upturn to above the previous close. Sales attributed to a southwestern long produced a reaction which, however, was short lived. The close was firm with september at 97½, a net gain of ½. May finished with an advance of 2½ compared with last night.

Corn—Reports of replanting in many sections were received and prices showed increased firmness. The close was strong with September ½.6½ up at 15%.

NEW INCORPORATIONS.

ner, are the directors. The company owns a large tract of land and some water rights in Little Valley, Grand County.

A copy of the articles of incorporation of the Bauer Mining company of Ogden was filed with the secretary of state Tuesday. The company has a capital stock of \$100,000, divided into shares of the par value of \$1 cacen. C. A. Bauer is president; Carrie A. Zimmerma, vis president; Annie White, Irea. ick Gunnarson, are the directors. The company owns mining property in the company owns mining property in the weber mining district. Weber county. An amendment to the articles of incorporation of the Farmington was filed with the secretary of fatate Tuesday by which the capital stock of the company is increased from \$5.000 to \$5.000 divided into shares of the par value of \$1 each.

BUSINESS AND REALTY

Occupants of several oid shacks that have encumbered the valuable property on Main street immediately south of the Judge building have been notified to vacate by June 1, and it is understood the Burlington syndicate company, which owns the property, will erect a modern one-story building on the 50x100 feet. The firms ordered it vacate are Schmidt's restaurant, Anderson & Cummings real extate office, Bernstein cigar store and Neilson & Johnson.

Recently C. P. Overfield purchased the property on the east side of Statementh of the Rex hotel, now occupied by an old adobe building, the occupants of which have been notified by acate, and it is the intention of the new owner to improve the ground by erecting thereon several one-story stere buildings, later to be followed by a more impossing structure.

The old location of the Lines Supply company, First South, between West Temple and First West streets, has been leased by the Colonial State Laundry company. The Lines Supply Laundry company. The Lines Supply company will soon move into fine new quarters on State street near Sixta South, where the company has completed one of the best equipped and largest modern laundries in the west spending a small fortune in the building and plant, which includes every up-to-date apparatus and device known to the laundry business.

Ten of the 27 countles in Itah have signified their intention of taking space in the state exhibit to be

Wiliam Wilson and D. E. Law have dissolved their floral partnership, the former continuing the business.

H. Elmer of Helper has purchased a modern four-room cottage of line avenue for \$2,000 from the Salt Lake Security & Trust company.

Arrangements are being made for opening a new laundry at 161 Fourth East street, the old building at hat point having been leased for five years by F. B. Platt, R. W. Young and Samuel Russell. About \$10,000 will be copended in remodeling the place and making it suitable for the purpose. WALKER BROS., Bankers
